- [1] Revenue estimates are prepared using our 2009 estimating models, which rely on the Congressional Budget Office's January 2009 macroeconomic forecasts. The Congressional Budget Office plans to prepare a March revision to its baseline macroeconomic assumptions. If large-scale stimulus legislation is enacted early in 2009, the Congressional Budget Office's March 2009 revised macroeconomic forecasts could be expected to differ, perhaps significantly, from their January 2009 counterparts. In that case, we anticipate that we would revise our 2009 estimating models to reflect the Congressional Budget Office's March 2009 macroeconomic forecasts: revenue estimates prepared using these revised March 2009 macroeconomic inputs again could differ, perhaps materially, from revenue estimates of the same request using our 2009 models with January 2009 macroeconomic forecasts.
- [2] Estimated outlay effects as a result of U.S. possessions provision provided by the Joint Committee on Taxation in consultation with the Congressional Budget Office.
